Closing Death's Door-Michael J. Saks 2021-01-04 After heart disease and cancer, the third leading cause of death in the United States is iatrogenic injury (avoidable injury or infection caused by a healer). Research suggests that avoidable errors claim several hundred thousand lives every year. The principal economic counterforce to such errors, malpractice litigation, has never been a particularly effective deterrent for a host of reasons, with fewer than 3% of negligently injured patients (or their families) receiving any compensation from a doctor or hospital's insurer. Closing Death's Door brings the psychology of decision making together with the law to explore ways to improve patient safety and reduce iatrogenic injury, when neither the healthcare industry itself nor the legal system has made a substantial dent in the problem. Beginning with an unflinching introduction to the problem of patient safety, the authors go on to define iatrogenic injury and its scope, shedding light on the culture and structure of a healthcare industry that has failed to effectively address the problem-and indeed that has influenced legislation to weaken existing legal protections and impede the adoption of potentially promising reforms. Examining the weak points in existing systems with an eye to using law to more effectively bring about improvement, the authors conclude by offering a set of ideas intended to start a conversation that will lead to new legal policies that lower the risk of harm to patients. Closing Death's Door is brought to vivid life by the stories of individuals and groups that have played leading roles in the nation's struggle with iatrogenic injury, and is essential reading for medical and legal professionals, as well as lawmakers and laypeople with an interest in healthcare policy.

**Closing the Book**
Joelle Renstrom 2015-08-18 Literary Nonfiction. Essays. Memoir. CLOSING THE BOOK: TRAVELS IN LIFE, LOSS, AND LITERATURE explores the intersection of literature and life in personal essays about traveling, teaching, reading, writing, living, and dying. Each essay's narrative arc is formed and informed by the act of reading literature that makes a reader feel like the book she's reading was somehow written specifically for her to read in that exact moment. Renstrom relies on science fiction as a catalyst for grief, as well as a means of pushing past grim realities to begin envisioning life reconstructed and to embrace the idea that "there's nothing wrong with rebuilding forever."

Life and Death in Freud and Heidegger-Havi Carel 2006-01 Life and Death in Freud and Heidegger argues that mortality is a fundamental structuring element in human life. The ordinary view of life and death regards them as dichotomous and separate. This book explains why this view is unsatisfactory and presents a new model of the relationship between life and death that sees them as interlinked. Using Heidegger's concept of being towards death and Freud's notion of the death drive, it demonstrates the extensive influence death has on everyday life and gives an account of its structural and existential significance. By bringing the two perspectives together, this book presents a reading of death that establishes its significance for life, creates a meeting point for philosophical and psychoanalytical perspectives, and examines the problems and strengths of each. Finally, it works out the ethical consequences of this view. This volume is of interest for philosophers, mental health practitioners and those working in the field of death studies.

Theology and Issues of Life and Death—John Heywood Thomas 2013-03-20 "Does theology have any relevance to the problem of life and death?" According to John Heywood Thomas the answer is an unequivocal yes. A largely personal expression of this conviction precedes the argument's exposition, which is then stated first of all quite generally—that nothing human is alien to theology's concern. Three main issues are considered: the unborn life, death as an event in life, and the possibility of global death. The issue of a life before birth is a complex problem, requiring an awareness of philosophical issues as of the empirical factors. The same kind of multifaceted thinking is needed in confronting the issue of death, an inescapable topic for theology. If death is an event in life what does it reveal about the meaning of life? And what of the very human action of the funeral? After a discussion of the complex issues involved the argument returns to the global reference of theology. Two areas of concern are singled out to show that the theologian can offer guidance in debate: the environmental crisis and the threat of nuclear war.

Now You See it—Cathy N. Davidson 2012 Documents a 2003 experiment at Duke University where the author had free iPods issued to the freshman class to see how the device could be used academically, in a report that reveals other technological ideas that are revolutionizing education.

Ending with Hope—Beth Ann Gaede 2002-06-01 Why is it we do funerals so well but often balk at even recognizing the death of a congregation? Couldn't we do grief ministry and funerals as well for social groups as we do for individuals?" challenges Gilson Waldkoenig, in his seminary classes. Waldkoenig, associate professor of church in society at Lutheran Theological Seminary at Gettysburg, contributes his special insights on the subject of church endings, in this unique and important book. Ending with Hope grows out of the understanding that although closing a congregation is in many ways about dying, it can also be about new life. Closing a congregation does not have to be about failure but can be about redirecting resources for new ministry. Contributors represent eight denominations and include more than a dozen pastors, lay leaders, judicatory staff, and others who have "been there"—who have helped congregations through the painful closing process. Resources include models for assessing whether a congregation should close; reflections on members' and pastors' experiences during closing; case studies; guidance for deciding what to do with a building; suggestions for selecting and preserving documents and artifacts; rituals for healthy closings; a survey of historical trends regarding closings; and other helpful materials.
