Introduction To Transrational Thinking Philosophy

A Brief Introduction to Philosophical Thinking

A brief introduction to transrational thinking philosophy aims to introduce some of the main elements of the theory. Transrational Thinking (TA) is a very useful and fascinating framework for analysing the behaviour of both ourselves and other people. It offers some very useful insights into the impact of different behavioural styles on relationships between people.

Transrational thinking is a combination of the rational-analytical power of thinking and the intuitive-creative side of our mind that is not analytical but rather synthetic in character. Transrational Thinking directly taps into reality (Hyponoesis).

Introduction To Transrational Thinking - Philosophy of Mind

Introduction to Transrational Thinking - Philosophy of Mind Introduction to Transrational Thinking Abstract: Transrational Thinking is a combination of the rational-analytical power of thinking and the intuitive-creative side of our mind that is not analytical but rather synthetic in character. Transrational Thinking directly taps into reality (Hyponoesis).
